W. H. ROGERS

GREENLAWN, LONG ISLAND, NEW YORK

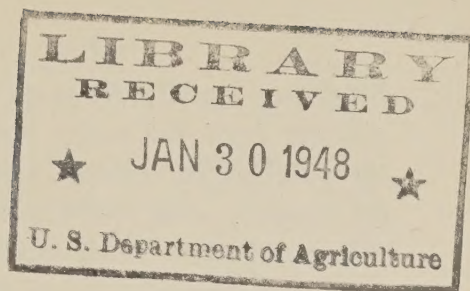

*Spring 1948*

In presenting my first price list I would like to state that I started to grow glads in 1937. I started with 20 mixed bulbs. The following year I added a very few named varieties and from then on I have added and discarded and now grow over 400 named varieties — not all in sufficient quantities to be able to list them for sale. In the beginning my idea was to have a few nice flowers, then it became a hobby and while it is still a hobby it has rather outgrown that idea altogether. I do not have a large patch and consequently many of the varieties listed are available in quite limited numbers because every bulb I will send you has been grown in my own garden. I definitely do not and will not buy bulbs for resale. My glads have been inspected and I hold Certificate No. 2602 issued by New York State Department of Agriculture and Markets.

I have never exhibited but select my varieties because of their value to me as cut flowers for a select trade among local florists, as well as their beauty to myself and Mrs. Rogers. Every bulb is planted, cared for, dug, cleaned and graded by hand and the work is all done by Mrs. Rogers and myself, thereby giving every operation personal attention. Likewise your order will be attended to by us.

We have established a very good reputation among local florists for producing highest quality blooms and we believe that no small part of the reason for these good blooms comes from quality bulbs. These are the bulbs we grow ourselves and now offer to you.

In recent years I have limited my addition of new varieties to the purchase of bulblets whenever possible and my success by this method has been very gratifying. In this way your new additions are purchased at the lowest possible cost. You can purchase varieties which you otherwise might consider too expensive and you will be surprised how quickly five or ten bulblets will get you started. By the purchase of bulblets you should not expect too many blooms the first year but many

times you are happily surprised. Neither are you going to get the size spike you will get from the larger bulb the next year. Even though I have just suggested the purchase of bulblets, I feel that I should also give a word of caution. If handled properly some varieties will germinate almost 100 per cent, while other varieties will germinate a much smaller percentage and therefore it is not possible for me to make any guarantee as to germination. And furthermore not all varieties produce large bulblets and neither is it necessary to have large bulblets to get good germination, but they should be good, plump, mature ones. I will always send good mature ones and the largest available. In my opinion, to get best results they should be peeled or cracked before planting and then planted right away before they become dry or hard. I also believe that better germination is obtained if not planted until the ground becomes warm enough to induce prompt germination.

If you have never had Long Island grown bulbs, I hope you will give them a trial. Our season is long as we can start planting the last of March or very first days of April and can dig the bulbs up to November 15th, a period of over seven months or 30 weeks. Therefore our bulbs and bulblets have plenty time in which to mature I also have irrigation to use at any time when necessary.

**TERMS, PRICES AND SHIPMENT —** On all orders for \$5.00, or less, cash with order - over \$5.00, 25% cash with order and balance before shipment. Minimum order \$2.00. I can not accept orders for less than the smallest unit quoted. For instance, where listed 2 for 20, one cannot be had for 10. Five bulbs can be had at the 10 rate and 50 bulblets at the 100 rate only when the price is \$1.00 or more per 100. Transportation to points within the United States will be prepaid when shipment is made at my option as to parcel post or express. Parcel post shipments cannot be made safely until spring but if shipment is desired before then, I will ship express immediately, charges collect, and include extras to help in paying such charges. As is the custom of all shippers, I will include extras anyway and in place of many complicated, discount offers, I will give additional overcount or extras depending on size of order when cash in full accompanies the order. You might suggest which you prefer.

**SUBSTITUTION —** All stock offered subject to prior sale. Remember I sell only the bulbs I have grown myself and therefore supply is limited and on some varieties quite limited, so you should order early. I will not substitute either size or variety without you so direct and will refund immediately on any item I cannot supply. If you wish substitution, I would appreciate your second choice with your order.

**GUARANTEE —** It is my intention to send out only good, clean, healthy bulbs and true to name. I make no guarantee as to growth and will in no way be responsible for the crop. If upon receipt of bulbs, you find them unsatisfactory, return at my expense and I will cheerfully refund the full purchase price. And furthermore if you later find any not true to name, I am ready to replace, refund, or make adjustment.

	large 1 1/4" & up per 10	medium 3/4" - 1 1/4" per 10	bulblets per 100

#### WHOLESALE LISTS

I have a small number of varieties that I can offer in larger quantities. Can also supply bulblets in quantities from quarter pints to several quarts in approximately 100 varieties. If you are interested in either of these wholesale lists just drop me a postal card and I will forward same immediately. If interested in any particular variety you might mention that.
